AP Diving

AP Diving (Ambient Pressure Diving) manufactures few open circuit SCUBA regulators. However, they do have a range of cylinder valves and rebreathers.

First Stages

AP Diving - FFS101

Apeks

Apeks has been bought by Aqualung in 1997.

- DS stands for “Dry-Sealed”. These regulators have an environmentally sealed bias spring.
- US stand for “Un-sealed”. These regulators have no environmental seal.
- T stands for “Turret”. These regulators have a swiveling turret.
- A lot of Apeks regulators use the main basic design, hence their confusing naming scheme.
- The following models use the same body or just have different names: T20, AT20, XTX20, US1, US4, DS1, DS4.
- The following models use the same body or just have different names: TX40, ATX40, XTX40, TX50, ATX50, XTX50.
- The following models use the same body or just have different names: XTX DST, XTX UST.
- The following models use the same body or just have different names: FST, TX100, ATX100, XTX100.
- The following models use the same body or just have different names: FSR, ATX200, XTX200, Black Pearl (More or less), Tungsten (More or less),

Aqualung

Aqualung is an Umbrella corporation for the following companies:

- In 1956 it acquired U.S. Divers
- In 1979 it acquired TechniSub.
- In 1990 it acquired SeaQuest.
- In 1992 it acquired Deep See.
- In 1997 it acquired Apeks.

In 1998 it unified most of the above trademarks under the Aqualung name.

A lot of Aqualung regulators use the main basic design, hence their confusing naming scheme. Regulators get new names by the addition of an environmental seal, external IP adjustment screw, etc.

- The following models use the same body or just have different names: Calypso, Partner, Aquarius, SQ Mirage.
- The following models use the same body or just have different names: Conshelf 20, Conshelf 21, Conshelf 22.
- The following models use the same body or just have different names: Conshelf XIV, Conshelf XIV Supreme.
- The following models use the same body or just have different names: Core, Core Supreme.
- The following models use the same body or just have different names: Kronos, Kronos Supreme.
- The following models use the same body or just have different names: Legend, Legend Supreme, Legend Glacia, Legend LX, Legend LX Supreme, Legend LUX Supreme.
- The following models use the same body or just have different names: Pioneer, Nordic, SeaQuest Century.
- The following models use the same body or just have different names: SEA, Cousteau, SeaQuest Spectrum.
- The following models use the same body or just have different names: Heli, Helix Pro.
- The following models use the same body or just have different names: Titan, Titan LX, Titan LX Supreme.

Mares

Mares bought Dacor in 1999.

- The prefix MR designates balanced diaphragm first stages.
- The prefix R designates a piston first stage.
- The prefix SCS (Spherical core seal) is the same as the prefix V. It was used at some stage instead of the MR prefix when Mares introduced a seat design.
- The suffix CWD (Cold water dive) designates a cold-water kit fitted.
- The suffix T indicates a poppet that uses brass, polyurethane and high modulus polyurethane.
- The suffix S designates a short version of a first stage.
- The suffix ACT (Advanced coating technology) indicates a poppet that Mares introduced around 2015.
